

Fluid thinking. Solid results.

# Rice Earth Sciences

Ensuring  
your  
success

**RICE** Earth  
Sciences  
A DIVISION OF RICE RESOURCE TECHNOLOGIES

# The elements of a successful project.

Earth Sciences is about finding a better, more responsible, more accountable way of doing things. Rice Earth Sciences is about making it easier for our clients to achieve these objectives – while maintaining operational excellence.

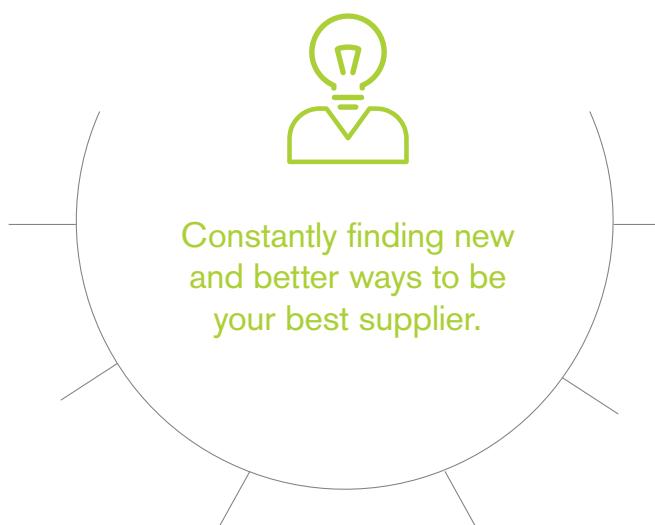

Our Earth Sciences division provides a complete package of products and supplies, custom design, and fabrication solutions required in environmental, geotechnical and industrial projects of various scope and complexity.

Since 1952, we've been developing innovative products and solutions to help clients across Canada excel in projects involving geotechnics, air, soil and water.

**A Proven Supplier:** The strength of decades of experience, dedicated employees, and thousands of products.

**Dependable Product Inventory:** The broadest product line in the industry, waiting at the ready.

**Responsive Service:**  
A Guaranteed Quote Response: 45-minutes for stock items, 4-hours on non-stock items.

**Custom “Off-the-Shelf” Solutions:** Unmatched design and fabrication experience on products that aren't available, or simply don't exist.

**Local technical support and troubleshooting:** Locations across Canada to ensure customer success.

**Value-Added Services:** Full-service support: from shipping to packaging to inventory management.

# A Comprehensive catalogue of Earth Sciences solutions.

Rice Earth Sciences products are manufactured to exacting standards: ensuring the highest degree of quality, durability and consistency. We make it easy for you to choose our uncompromising products – and to do business with us.

## **Environmental Instrumentation, Equipment & Supplies**

Accuracy and dependability are paramount to your environmental program. Rice offers a wide array of professional monitoring, metering, sensory and sampling tools.

## **Geotechnical Instrumentation & Supplies**

Measure. Assess. Excel. Our technology provides the vital data and information required to make informed decisions and complete your project with confidence.

## **Remediation Equipment and Supplies**

A great deal of care, planning and hard work goes into site remediation. Rice provides the tools you require throughout all phases.

## **Environmental, Geotechnical and Waterwell Drilling Supplies**

Equip yourself with our leading inventory of products and supplies to take on your drilling challenges with complete confidence.

## **Remote Data Collection**

Data collection can make or break a project. Rice technology transmits accurate real-time data to your doorstep, eliminating the delay and expense of sending a crew into the field.

## **Custom Manufacturing**

Rice has the products you need. If we don't, we'll create them. Many products now considered to be the industry-standard were developed by Rice.

## **Rice Rentals**

Some equipment is important to have, but costly to own. Rice has an extensive rental catalogue that includes instrumentation, field equipment and more.

We  
understand  
your sector.

We know your  
applications.

The team at **Rice Earth Sciences** supports you through an in-depth understanding of your industry, the applications for our products, and the real-world challenges both you and our products face.
