success

RICE Industrial
Products

A DIVISION OF RICE RESOURCE TECHNOLOGIES

A key component in your operational success

Choosing the right parts and components is key to operational efficiency and employee safety. **Rice Industrial Products** has helped clients overcome industrial challenges involving the control and management of fluids and gases since 1952.

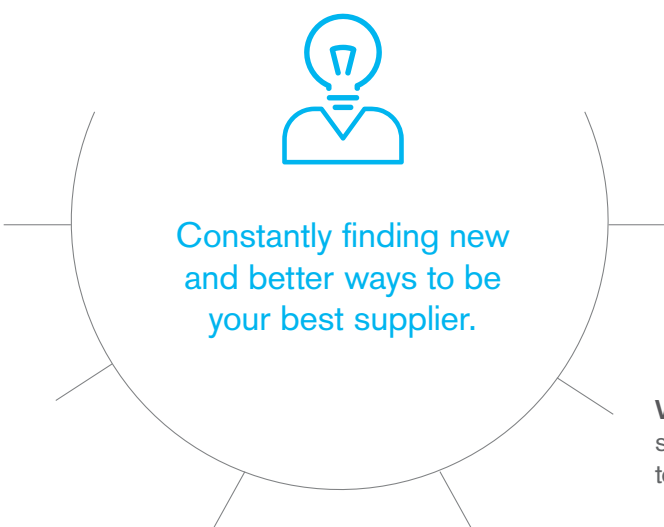

Our business is about more than parts. It is about people. Our skilled team of professional advisors understand your business, and will seamlessly connect you with the best in class solutions to your needs.

Rice Industrial Products are built to Canada's highest quality standards, while providing exceptional value and reliability.

A Proven Supplier: The strength of decades of experience, dedicated employees, and thousands of products.

Dependable Product Inventory: The broadest product line in the industry, waiting at the ready.

Responsive Service:
A Guaranteed Quote
Response: 45-minutes for stock items, 4-hours on non-stock items.

Custom "Off-the-Shelf" Solutions: Unmatched design and fabrication experience on products that aren't available, or simply don't exist.

Local technical support and troubleshooting: Locations across Canada to ensure customer success.

Value-Added Services: Full-service support: from shipping to packaging to inventory management.

We understand your sector.

We know your
applications.

The team at **Rice Industrial
Products** supports you through
an in-depth understanding of
your industry, the applications for
our products, and the real-world
challenges both you and our
products face.

A leading selection of industrial pipe and fluid essentials

Rice Industrial Products are manufactured to provide premium performance in the most demanding industrial applications. When you see the Rice name, you can be assured of exceptional quality, durability and consistency. We work with leading global manufacturers to supply some of the top brands in the industry; names like IPEX®, Chemline® and Spears®, among many others.

At Rice, we make it easy for you to choose our uncompromising products – and to do business with us.

Thermoplastic Pipes and Fittings

Rice offers a comprehensive range of integrated process piping systems designed to meet the temperature, pressure and size requirements of a wide range of chemical processing and industrial applications. Our leading line of pipes and fittings include PVC, CPVC, PVDF, HDPE, Teflon, and other more specialized materials.

Thermoplastic Valves and Flow Control

Choose from a wide inventory of products: from ball valves to check valves to float valves. Available in PVC, CPVC, PVDF, HDPE, Teflon and more.

Actuation and Control

Rice's precision actuation and control systems allow you to automate your processes with the utmost confidence.

Flow Meters and Instrumentation

Rice's flow meters and instrumentation products provide the accurate monitoring and control that is central to your processes.

Strainers and Filters

We offer a wide selection of Y-Strainers and Basket Strainers to keep your systems clean and free.

Custom Manufacturing

Rice has the products you need. If we don't, we'll create them. Rice's in-house manufacturing and design team can collaborate with you to bring an innovative idea to life or devise a workaround in situations where the product you need simply does not exist. Our unique skillset and equipment allows Rice to thread, slot, perforate, bend, mold and machine to fit unique design and deadline requirements.

What is today's challenge?

For a complete catalogue of our Industrial Products, visit our website or contact our Industrial Products team. If you have any questions specific to your application, pricing or delivery, we are at your service.
